

Neste Special Coolant

Coolant concentrate

PERFORMANCE CLAIMS

BS 6580: 2010

ASTM D3306 Type I

DESCRIPTION

Neste Special Coolant is a monoethylene glycol based coolant concentrate providing frost and corrosion protection.

SPECIAL FEATURES AND BENEFITS

-good frost protection

TYPICAL CHARACTERISTICS

Density kg/m ³ 20°C	1131
Freezing protection, 33 vol-% solution	-18 °C
Freezing protection, 50 vol-% solution	-35 °C
Colour	Green
pH 33 vol-% solution	8,3
pH 50 vol-% solution	8,4

APPLICATIONS

Neste Special Coolant is recommended to both in gasoline engine and diesel engine cars. Corrosion inhibitors are effective only if the cooling systems contains enough of them. Therefore it is important, that the cooling systems contains allways at least 33 vol-% of Neste Special Coolant.

It is not recommended to mix Neste Special Coolant with other coolants.
